

Marcellus

Full Depth Reclamation

The Processes

- ❖ Pulverize the existing roadway to the depth specified
- ❖ Added the additive at the correct amount in the design
- ❖ Pulverize the additive and the roadway materials.
- ❖ If necessary re-pulverize the additive and roadway materials
- ❖ Grade to the required depth and scope of the project plans
- ❖ Compact the mixed and graded roadway to the desired density.

Full Depth Reclamation

Full Depth Reclamation

- ❖ After the roadway has been Prime Coated and has dried sufficiently
- ❖ Place a Hot Mix Asphalt Surface to the desired thickness in the contract and compact.
